
Responding to Posted Matrix Book Data

Posted by frosty - 2008/10/09 14:21

Matrix Book Data has a degree of subjectivity. Please feel free to discuss the posts. There is no need for heated arguments, but there is certainly room to discuss why we would sort the data differently.

You may also wish to complete incomplete Matrix Book Data.

If you are completing a post or reorganizing it, please post in the standard Matrix Book Data Format.

If you are simply asking a question there is no need to use the format, just pose your question.
